Subject: RE: WellSTAR and the UIC national database

Hi Liz --

Thank you for getting back to me so quickly. Friday is Good Friday so I will be out of the office all day; however, I can meet on the 4th if that works for you?

The objective of WellSTAR is a single data repository or 'source of truth' for all DOGGR data. While the application is undergoing configuration, we are also in the process of building a temporary staging database to house the UIC data requirements for project reviews so we can consolidate the data into a searchable format, confirm it, and migrate it to WellSTAR. We can fill you in more about the status when we chat.

Thanks again and I look forward to working with you!

Catherine A. Kendall, PMP

Subject: WellSTAR and the UIC national database

Hello Catherine and Jerry:

Please let me know if you would like to meet via webinar on Friday, 3/25 or the week of April 4, to share with me details of the WellSTAR application including its structure.

As Jerry may have mentioned, the process of UIC reporting for DOGGR has been challenging for the last few years as we have a hybrid of paper forms (7520s) from the districts and inventory data from the existing well operations data set. Each reporting season, twice per year, probably entails a combined 40 hours from DOGGR and Region 9 personnel to satisfy reporting obligations. If this method can be simplified by the extract of electronic data from WellSTAR, this would be a significant accomplishment and a big time saver for all of us.

Most of the state Class II programs have already begun flowing data to the national UIC database. There may be other states who could advise on Class II specific concerns.

The UIC data table structure is available online at <http://www.exchangenetwork.net/data-exchange/underground-injection-controls/>. We can review the contents of that site during the webinar after I have a better understanding of where you are in the process.

Thanks, and I look forward to speaking with you soon.

Sincerely,

(Liz)

Subject: RE: Contact Information

Hi Catherine,

Thank you so much for the email message and for your presentation on WellSTAR last week. Our UIC data coordinator is Elizabeth Janes, who I am copying on this message. I think it would be helpful for the two of you to connect and Liz can also facilitate outreach at the proper time to our UIC data folks in EPA HQs.

It was very good to meet you and I look forward to working together as the State makes progress on the WellSTAR project.

Regards,

David

Hello EPA Colleagues:

I apologize for the late note; your email addresses kept bouncing back.

Below is my contact information. Please have your data contacts reach out to me any time.

I look forward to keeping you apprised of our status and working with you. Please do not hesitate to let me know if you have questions.

I will also add you to our WellSTAR newsletter distribution to keep you updated on our larger consolidation project.

Thank you.
